Forme scultoree che prendono ispirazione dal classico, ma rivisitate in chiave moderna sono il leitmotiv delle collezioni di Fratelli Boffi. L'antica tradizione ebanista e l'esperienza artigianale dell'azienda danno vita ogni anno ad una ricca varietà di prodotti in cui materiali e forme sono protagonisti assoluti: una raccolta di arredi che risponde al comfort contemporaneo, rimanendo modernamente funzionale, pur non distaccandosi dalla preziosa eredità della tradizione.

Patchwork armonico di materiali, forme ed espressioni ogni collezione è definita da proporzione, fantasia e ricerca meticolosa di finiture ed essenze pregiate riviste in chiave contemporanea che aggiungono eccentriche visioni e interpretazioni ironiche mettendo insieme la lunga tradizione italiana nel campo della lavorazione del legno con tecniche all'avanguardia nel campo delle finiture che Fratelli Boffi da anni esplora per trasmettere una personale e originale concezione sul design e il mondo dell'arredo. *Sculpted forms inspired by classicism, but revisited with a modern take, are the leitmotiv of Fratelli Boffi.*

The old cabinet-making tradition and the handcraft experience of the company give life to a wide range of products where materials and forms are the absolute leaders: a collection of furniture that responds to contemporary comfort, while remaining modernly functional, despite detaching itself from the precious legacy of tradition.

A harmonious patchwork of materials, shapes and expressions, every collection is defined by proportion, fantasy and by a meticulous search for finishings and fine essences, revisited with a contemporary take, providing the whole concept with eccentric visions and ironic interpretations to combine the long Italian tradition in the field of wood manufacturing with well-advanced techniques in the field of finishings, that Fratelli Boffi has explored for years in order to convey a personal and original conception of design and the world of furniture.

La Fratelli Boffi è un'azienda che possiede due anime forti: la prima si dedica alla ricerca e ne percorre tutte le possibili strade; la seconda invece si esprime con autorevolezza nel mondo degli spazi collettivi e nel contract più in generale, con progetti anche chiavi in mano, facendo tesoro dell'esperienza maturata nelle collezioni che ha sviluppato negli anni e che formano l'ossatura del catalogo.

La storia inizia nel 1928 con Carlo Boffi che, da artigiano, si conquista la fama di uno dei migliori intagliatori di sedie, capace di riproporre lo stile tipico francese del periodo Louis XV - Louis XVI.

Nel 1953 iniziano a lavorare i figli Federico, Roberto e Michele e nel 1968 viene costruito il nuovo stabilimento di Lentate. Da fabbrica integrata, al cui interno sviluppa la lavorazione del legno massello, i pannelli, le imbottiture fino alle laccature, arriva poi il momento della tecnologia e in ogni reparto vengono inseriti nuovi macchinari. Parallelamente arriva anche la decisione di uscire dal piccolo mondo della Brianza ed aprirsi al mondo con la curiosità di chi sa fare, ma anche di chi vuole esplorare ed imporre cose nuove per poi fonderle nella propria azienda: inizia così l'internazionalizzazione e le collaborazioni con i grandi department store americani.

Negli anni '80 incominciano i primi incontri con il mondo del design di avanguardia e la collaborazione con Aldo Cibic, da cui è nata la collezione "Antologia", cresciuta negli anni e talmente caratterizzante che il nome "Antologia" è quasi inscindibile dal marchio aziendale. Contemporaneamente c'è stato l'incontro con Giorgio Pulici, consulente d'immagine per importanti aziende nel campo della moda, che si è rivolto a Fratelli Boffi inizialmente per creazioni su disegno di particolari display, scenografie legate a stand e sfilate e a spazi espositivi in genere. Il rapporto si è via via consolidato e le collaborazioni intensificate andando a formare molte delle collezioni che Fratelli Boffi ha sviluppato negli anni.

Dagli anni 2000 poi l'azienda ha intensificato le collaborazioni con i designer da tutto il mondo presentando di anno in anno nuovi ed eclettici prodotti nella cornice di stand suggestivi e affascinanti: a partire da Nigel Coates, Ferruccio Laviani, passando per Philippe Bestenheider, Martino Berghinz, Giopato & Coombes, Marc Krusin, Christophe de la Fontaine, fino ad arrivare alle collezioni degli ultimi anni firmate da Archer Humphryes Architects e Analogia Project.

Questa esigenza nasce anche dal fatto che la divisione contract di Fratelli Boffi collabora parallelamente con nomi del designer internazionale nello sviluppo e nella creazione di grandi progetti come hotel, case private, ville, residence o uffici in tutto il mondo. Pur mantenendo il proprio stile personale e non venendo meno ai propri standard di qualità, l'azienda è ormai rinomata nel panorama mondiale per la sua grande capacità di coniugare qualità, facilità nel risolvere i problemi e professionalità per soddisfare le richieste del cosiddetto "tailormade": capacità uniche che consentono di sviluppare un progetto completo. Una cultura del progetto più che del prodotto che proviene da un'esperienza storica e che non rinuncia all'artigianalità italiana, ma anzi ne fa il fiore all'occhiello di Fratelli Boffi. Ad oggi l'azienda conta una lunga serie di referenze che includono lo sviluppo e la creazione di grandi realizzazioni come hotel, case private, ville, residence o uffici in tutto il mondo.

The Fratelli Boffi is a company that possesses two strong souls: the first one is dedicated to the research and it goes through all possible ways, and the second one expresses itself with prestige in the world of public spaces and the contract more in general, also with turnkey projects, and experience gained in the collections that has developed over the years and which forms the backbone of the catalog.

The story begins in 1928 with Carlo Boffi, who as an artisan, achieved the reputation as one of the best chair carvers, capable of reproducing the typical French style of the Louis XV - Louis XVI period. In 1953 the second generation Federico, Roberto and Michele started working, and in 1968 the new plant in Lentate was constructed.

From integrated factory, in which the production of the solid wood, the panels, the paddings up to the lacquering expanded, came thereafter the time of technology and in every department new machines were integrated. At the same time, came the decision to exit from the small world of Brianza and open up to the world with the curiosity of who knows how to, but also of who wants to explore and impose new things for merging them in their own business: thus begins the internationalization and partnerships with the great American department stores.

In the 80s began the first encounter with the world of avant-garde design and collaboration with Aldo Cibic, which gave birth to the collection "Antologia", which has grown over the years and has become so distinctive that the name "Antologia" is almost inseparable with the corporate brand. At the same time, there was a meeting with Giorgio Pulici, the image consultant for major companies in the fashion industry, who initially addressed Fratelli Boffi for creations on the design of special display, scenic designs related to the booths and fashion shows and to the exhibition spaces.

The relationship has gradually consolidated and collaborations have intensified, thus forming many of the collections which Fratelli Boffi has developed over the years.

From the 2000s onwards, the company has intensified its collaboration with the designers from around the world, presenting each year new and eclectic products in the framework of beautiful and fascinating booths: from Nigel Coates, Ferruccio Laviani, passing through Philippe Bestenheider, Martino Berghinz, Giopato & Coombes, Marc Krusin, Christophe de la Fontaine, to the latest collections signed by Archer Humphries Architects and Analogia Project.

This need arises from the fact that the contract division of Fratelli Boffi works in parallel with the international designer names in the development and creation of large projects such as hotels, private homes, villas, residences or offices around the world. While maintaining their own personal style and not compensating on its quality standards, the company is now well known in the world for its great ability to combine quality, ease in solving problems and professionalism to meet the demands of the so-called "tailor made": unique capabilities which allows to develop a complete project. A design culture, rather than the product that comes from historical experience and which does not renounce to the Italian craftsmanship, but rather as the flagship of Fratelli Boffi. Today the company boasts of a long series of references which include the development and the creation of such works as hotels, private houses, villas, residences or offices around the world.

BOFFI[®]
EDIZIONI

Maestoso e imperante il Good Vibrations di Ferruccio Laviani, è finalmente diventato realtà. Mobile contenitore dal sapore primordiale sembra essere stato deformato da una forte scossa o pervaso da movimenti oscillatori.

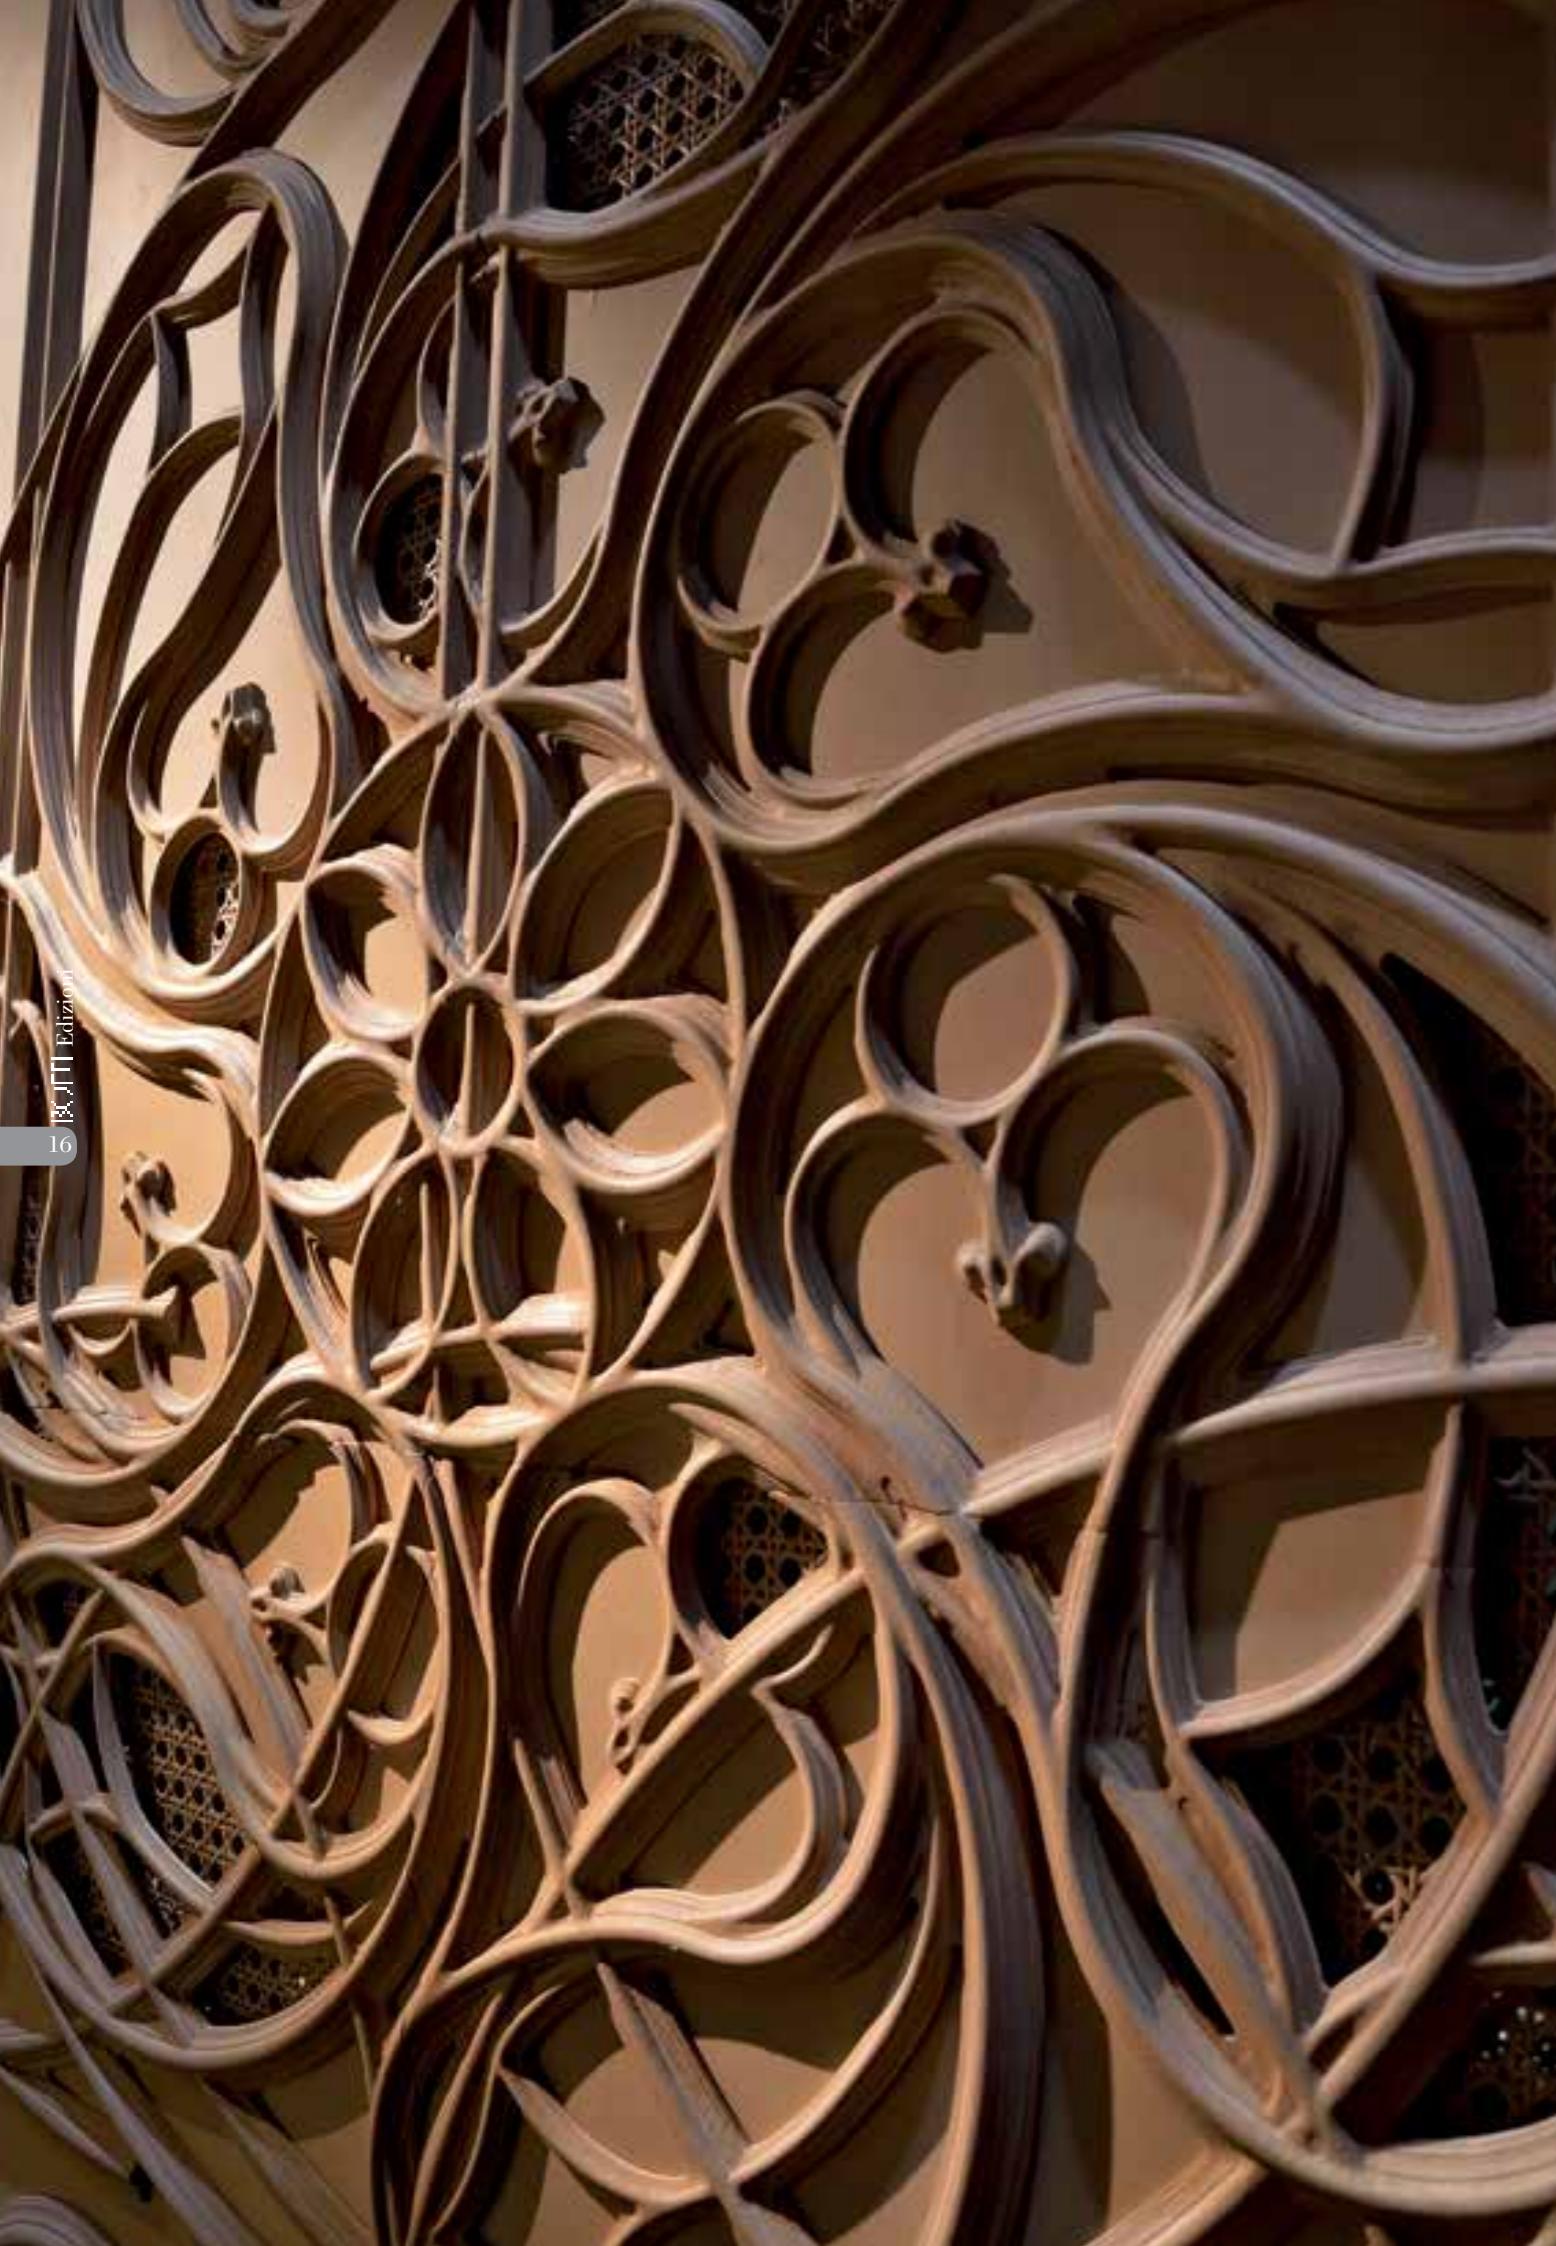

Sebbene voglia alterare decorazioni del passato e stilemi orientali, in realtà si fa forte proprio di una sapienza antica come quella dell'intaglio e della lavorazione artigianale del legno. *Good Vibrations by Ferruccio Laviani has come true at last. This primordial storage unit seems to have been deformed by a violent shake or pervaded by oscillatory movements. Despite trying to alter ancient decorations and Eastern stylistic features, it actually relies on the ancient knowledge of carving or wood handcraft.*

Good Vibrations

Design: Ferruccio Laviani

La Recherche

by Ferruccio Laviani

Anche se composta da due progetti stilisticamente opposti tra di loro, uno con chiaro riferimento all'architettura neogotica ed il secondo la rivisitazione del mobile italiano degli anni 50, la collezione **“La Recherche”** di Fratelli Boffi per il Salone del Mobile 2017 in realtà non è per nulla casuale. Infatti come nel libro di Proust, il ricordo è il mezzo per evolverci nel futuro attraverso la memoria e l'arte. Cercando di combinare questi due elementi uniti all'artigianalità e la tradizione nella lavorazione del legno di F.Lli Boffi, ho esasperato con la madia **Gothik-A** gli stilemi che contraddistinguono lo stile gotico incrociandoli, deformandoli, manipolandoli fino a creare una gabbia, una ragnatela in legno, che racchiude un contenitore in vetro.

Nel mobile **D/Vision** la scomposizione, la divisione appunto, su piani diversi di un classico buffet degli anni 50 ne ridisegna le linee rendendolo inaspettato e sorprendente pur lasciandone intravedere la forma originaria.

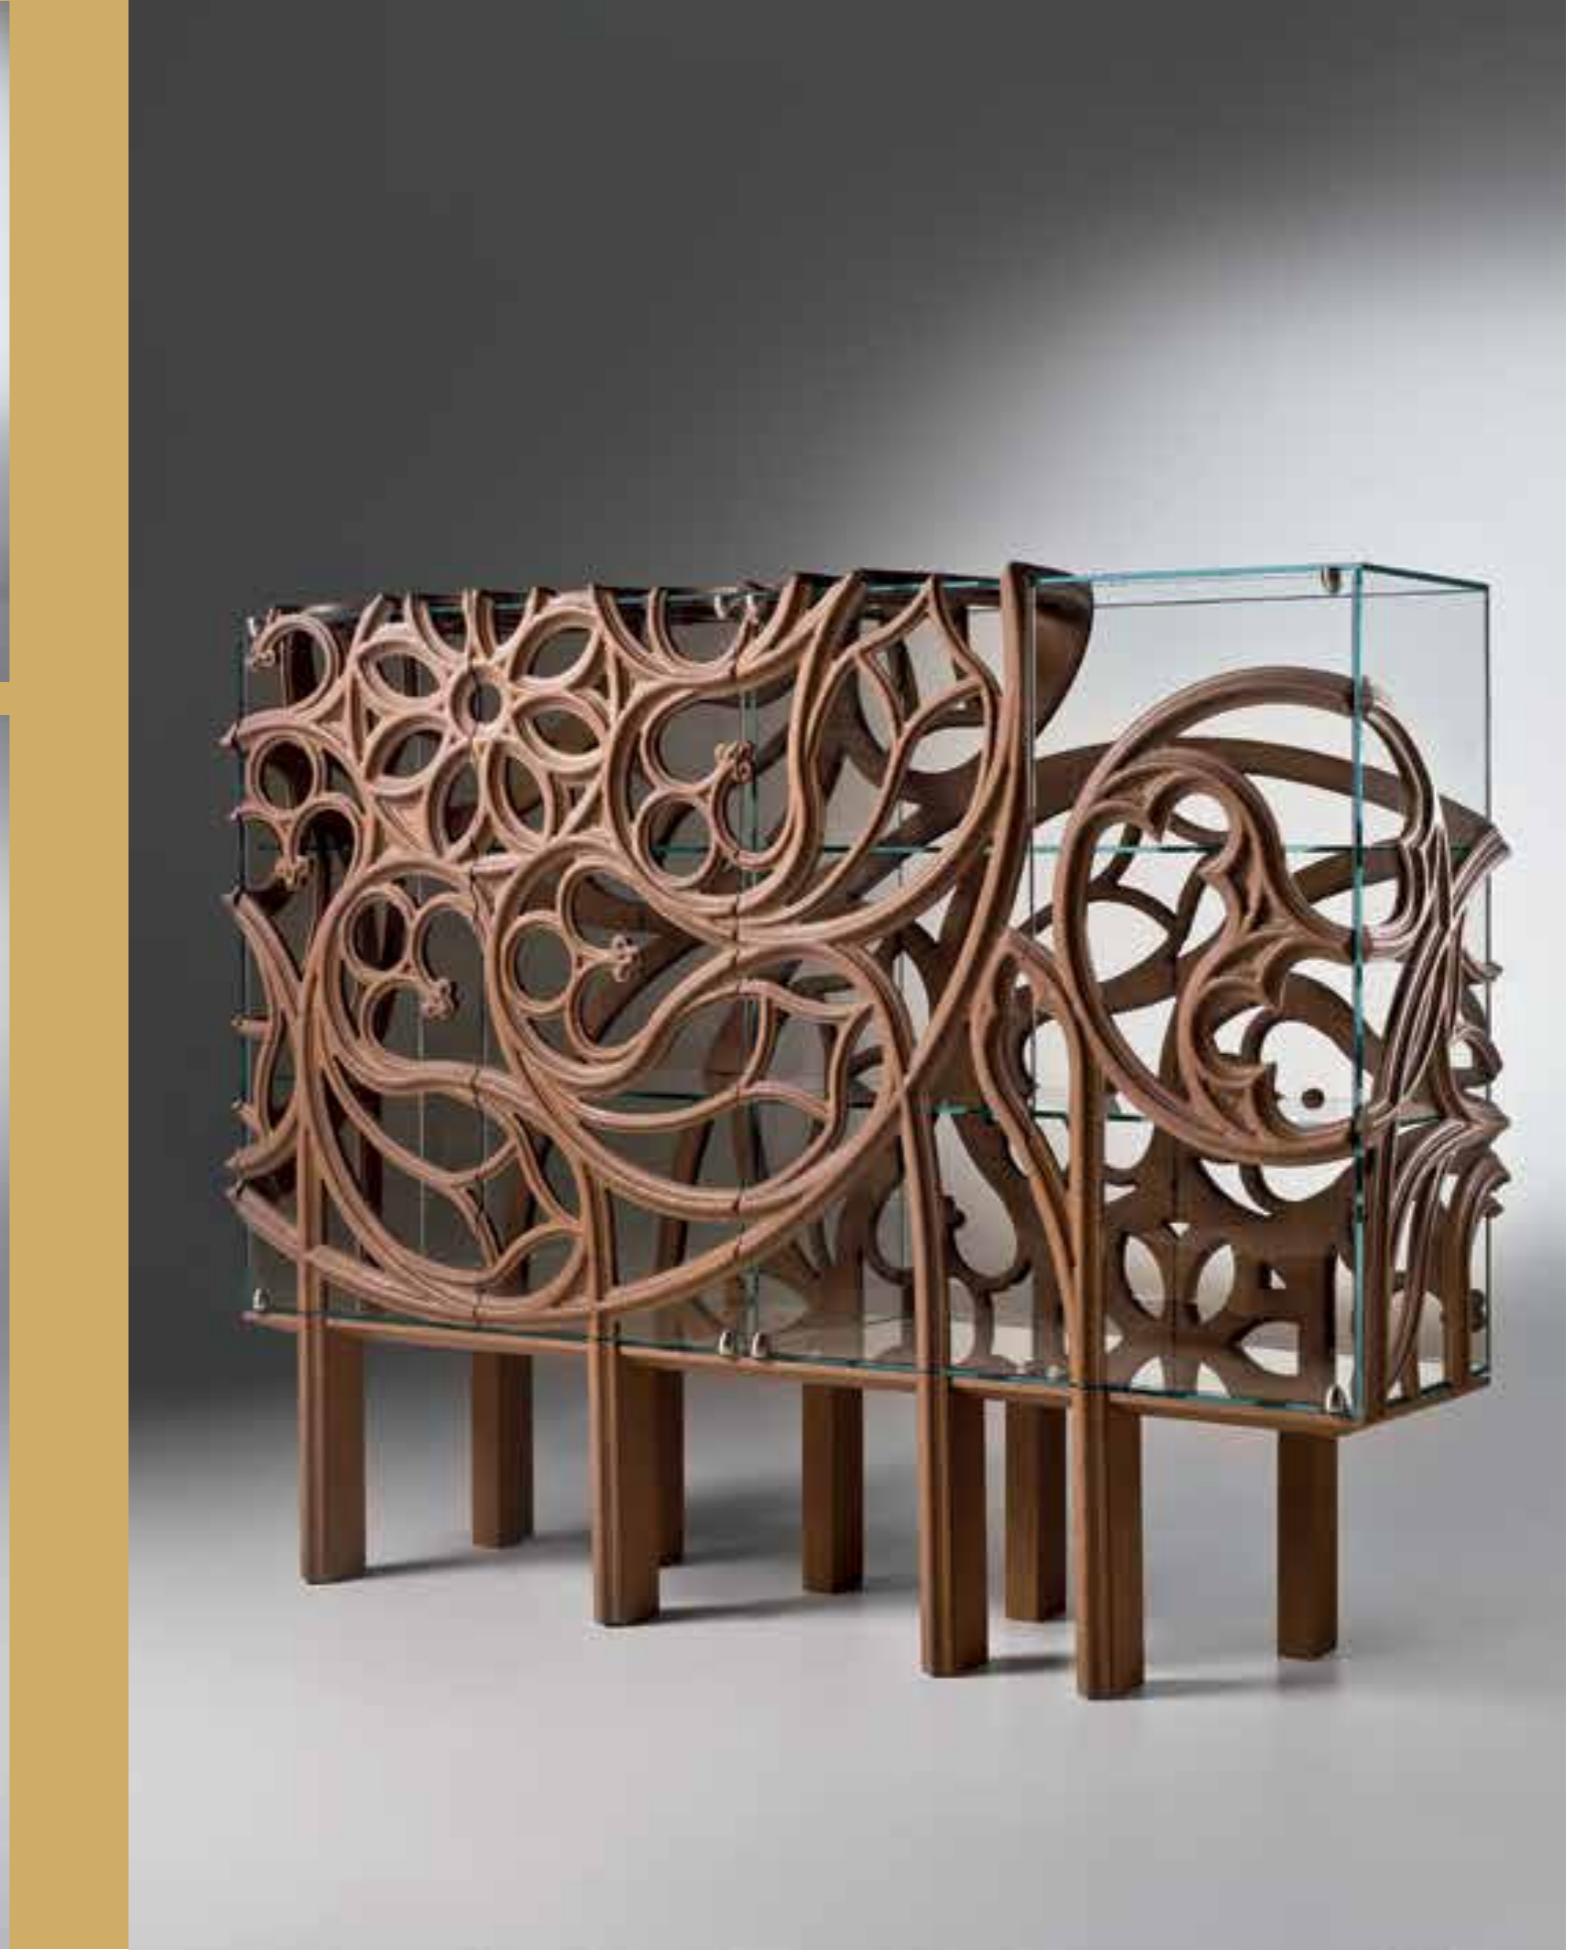

Esattamente come il gusto delle Madeleine che, come racconta Proust, anche mangiate dopo anni fanno riaffiorare memorie d'infanzia, così anche la collezione **“La recherche”** ci rimanda a quello che è l'archetipo di entrambi i mobili ma senza nessun retaggio nostalgico o di maniera tipico del mobile classico ma bensì rivolto al design del futuro, all'interior decoration contemporaneo, attraverso l'ineguagliabile qualità del mobile artigianale.

“Despite being composed of two stylistically different projects, one clearly inspired by Neogothic architecture and the other one being a reinterpretation of the Italian furniture of the 1950s, Fratelli Boffi's collection **‘La Recherche’** for Salone del Mobile 2017 is not casual at all. In fact, as in Proust's book, memory is the way for us to evolve through recollection and art. In the attempt of combining these two elements whose common feature is Fratelli Boffi's craftsmanship and woodworking tradition, with the cupboard **Gothik-A** I exaggerated the stylistic features of Gothic style merging them, distorting them, manipulating them to create a cage, a wooden cobweb, including a glass container. In the piece **D/Vision**, the decomposition or even division of a typical 50s buffet into different levels outlines its profile, making it an unexpected and surprising item, while still displaying its original shape. *Just like the taste of Madeleines which, as Proust stated, brings back childhood memories even after many years,* the collection **‘La Recherche’** recalls the archetype of both pieces of furniture, however, without the typical nostalgia or mannerism of classic furniture but with an eye on future design, contemporary interior decorations, through the incomparable quality of artisan furniture.”

A plissé collection

Project by Ugo La Pietra
1987/2017

Il mobiletto ‘Colonna’ e la consolle ‘Ballerina’ fanno parte di una collezione di mobili denominati ‘a plissé’ realizzati trent’anni fa dalla Fratelli Boffi. Questi oggetti rappresentano oggi il punto di partenza di un percorso di avvicinamento e di messa in relazione del design con l’artigianato artistico. Un processo che Ugo La Pietra ha avviato all’inizio degli anni Ottanta, sviluppandolo attraverso decine di mostre e teorizzandolo con la direzione di riviste come Area, Abitare con Arte, Artigianato tra arte e design. Questi mobili possono essere considerati quindi ‘il manifesto’ di quel movimento legato al neo-eclettismo che venne definito, nel primo convegno realizzato all’interno dell’allora nascente manifestazione ‘Abitare il Tempo’ di Verona, come ‘Classico-Contemporaneo’.

The cabinet ‘Colonna’ and console ‘Ballerina’ are part of a limited edition collection named “A plissé”, which Fratelli Boffi created thirty years ago. Today these objects represent the starting point for a project that sets out to connect design and artistic handicrafts. A process that Ugo La Pietra started during the early 1980s, developing it through tens of exhibitions and conceiving it with such magazines as Area, Abitare con Arte, Artigianato tra arte e design. These pieces can be seen as the ‘manifesto’ of a movement related to Neo-Eclecticism which was defined as ‘Classic-Contemporary’ at the first convention of the event ‘Abitare il Tempo’, which had just been set up in Verona.

ANALOGIA PROJECT

Analogia Project è il risultato di una collaborazione tra il designer Andrea Mancuso e l'architetto Emilia Serra. Le diverse forme hanno loro permesso di esplorare sia lo spazio sia gli oggetti. L'obiettivo dei loro progetti è di sperimentare nuovi linguaggi visivi ed esplorare il nostro rapporto con gli oggetti quotidiani, che normalmente vengono dati per scontati. Ogni progetto è un pretesto per trovare nuove strade e fondere processo digitale e artigianato. Hanno partecipato alle più importanti fiere del design europee e il loro lavoro è stato pubblicato in tutto il mondo.

Analogia Project is the result of a long-term collaboration between designer Andrea Mancuso and architect Emilia Serra. Their different backgrounds allowed them to explore both space and objects.

The aim of their projects is to experiment new visual language and explore our relationship with everyday elements that are normally taken for granted.

Every project is a pretext to find new ways to merge digital process and craftsmanship.

ARCHER HUMPHRIES ARCHITECTS

Archer Humphries Architects è uno studio con sede a Londra famoso per i suoi progetti che spaziano dall'architettura, all'interior e product design, leader nel mondo nell'ideazione di alberghi di lusso, ristoranti, resort, bar ed edifici residenziali.

Lo studio Archer Humphries Architects ha vinto molti premi, inclusi il famoso "Architect of the Year Award", il riconoscimento del "Royal Institute of British Architects" e l'ambito "Elle Decoration Award". Alla fine del 2014 verrà pubblicato nel Regno Unito un libro sul loro marchio pluripremiato, "cool+contemporary+classic". Con Fratelli Boffi hanno realizzato tutti gli arredi per il ristorante "Plum + Split Milk" all'interno del Great Northern Hotel di Londra premiati dall' "European Hotel Design Awards" come miglior progetto di interior dell'anno.

Archer Humphries Architects is a London-based studio, famous for its designs ranging from architecture to interior and product design, a world-level leader in designing luxury hotels, restaurants, resorts, bars and residential buildings. The studio Archer Humphries Architects has won a great number of awards, including the famous "Architect of the Year Award", the "Royal Institute of British Architects" award and the renowned "Elle Decoration Award". At the end of 2014 a book about their award-winning brand will be published in the United Kingdom, "cool+contemporary+classic". With Fratelli Boffi they furnished the whole restaurant "Plum + Split Milk" at London's Great Northern Hotel, awarded at the "European Hotel Design Awards" as the best interior design of the year.

**FERRUCCIO LAVIANI**

Ferruccio Laviani nasce a Cremona nel 1960. Nel 1984 ha conseguito il diploma presso la Scuola Politecnica di Design di Milano e nel 1986 la laurea in architettura al Politecnico di Milano. Collabora con aziende leader nel settore dell'arredamento e della moda - tra cui Kartell, Flos, Moroso, Dada / Molteni DePadova, Foscarini, Emmemobili, Fratelli Boffi, Dolce & Gabbana, Martini & Rossi, Swarovski, Porro - per le quali crea prodotti e supervisiona l'immagine aziendale per negozi, spazi ed eventi in tutto il mondo.

E' stato anche curatore e progettista di una serie di importanti esposizioni per aziende

come Memphis, Cosmit, Forum-Triton, Brazil.

Ferruccio Laviani was born in Cremona in 1960.

In 1984 he received a diploma at the Design Polytechnic of Milan and in 1986 a degree in

architecture at the Polytechnic of Milan.

He collaborates with leading companies in the sector of furnishing and fashion - including Kartell, Flos, Moroso, Dada / Molteni, DePadova, Foscarini, Emmemobili, Fratelli Boffi, Dolce & Gabbana, Martini & Rossi, Swarovski, Porro - for which

he creates products and supervises the

corporate image for stores, spaces and

events worldwide.

He has also been curator and designer of a

number of major exhibitions for companies

such as Memphis, Cosmit, Forum-Triton,

Brazil.

Giorgio Pulici is a recognised image consultant

working with a number of the most prestigious

names in the world of Italian fashion.

His partnership with Flli Boffi started out as an

opportunity to showcase his design work; he

handled the window dressing and scenography

for the presentation of the new collections.

A shared desire to experiment and to distinguish

themselves have proved to be the recipe for

success for this collaboration, one which bears

the hallmark of "growth".

Giorgio Pulici has been the brainchild behind a

number of Flli Boffi's most original creations,

demonstrating the strong affiliation that can exist

between fashion and design. This fusion of the

world of fashion with the world of furniture and

furnishings has resulted in collections having

an almost seasonal element of "fashion" about

them, just like on the catwalks, with particular

attention being paid to the colour, upholstery and

workmanship as well as the finishing touches.

Attention to detail whilst still devoting time to

experimentation in design have proved to be

the key features of the collaboration between

Giorgio Pulici and Flli Boffi.

GIORGIO PULICI

Giorgio Pulici, è noto come consulente di immagine per molti fra i più prestigiosi marchi della moda italiana. Inizialmente si avvale della collaborazione della F.lli Boffi per realizzare su sue idee e disegni, particolari display vetrine e scenografie per la presentazioni delle collezioni. Il successo di questa collaborazione, la comune voglia di sperimentare e differenziarsi parla di "crescita". Giorgio Pulici è stato l'ideatore di alcune delle più originali creazioni della F.lli Boffi a conferma del sodalizio che può esistere tra moda e design. I mondi della moda e dell'arredamento si sono incontrati, e questo interscambio ha dato vita a collezioni del sapore "fashion" quasi stagionali proprio come avviene nel mondo delle sfilate, con particolare attenzione ai colori ai rivestimenti, alle lavorazioni e alle finiture.

La cura del particolare senza dimenticare la ricerca formale sono i capisaldi della collaborazione tra Giorgio Pulici e la F.lli Boffi.

PHILIPPE BESTENHEIDER

Philippe Bestenheider nasce a Sion, in Svizzera, nel 1971. Nel 1998 si laurea in architettura al Politecnico di Zurigo e collabora con studi in Svizzera e negli Stati Uniti. Nel 2000 consegna il Master in Industrial design alla Domus Academy di Milano, dove successivamente viene invitato come workshop leader. Dal 2001 al 2006 è Senior Designer nello studio di Patricia Urquiola a Milano. Nel 2006 è invitato a partecipare alla mostra di Promosedia. Nel 2007 apre il proprio studio e lavora tra la Svizzera e Milano.

Philippe Bestenheider was born 1971 in Sion, Switzerland. In 1998 he had a degree in Architecture from the Swiss Federal Institute of Technology in Zurich, and worked for studios both in Switzerland and in the US.

In the year 2000 he obtained a Masters degree in industrial design from the Domus Academy in Milan, where he later was invited as a workshop leader. From 2001 to 2006 he was

Senior Designer in Patricia Urquiola's office in Milan, working for Moroso, Molteni, Agape, Alessi, Axor amongst others. In 2006 he is invited to take part to the Promosedia exhibit.

In 1997 began five-year professional experience at Rodolfo Dordoni Studio where he developed projects for several top luxury brands in the lighting and furniture fields. In 2000 he decided to create an independent activity opening his own design studio working for several Italian companies as Fontana Arte, Fratelli Boffi, Segno, Tucano e Contardi lighting system.

STUDIO R2

Lo studio R2d nasce a Milano nel 2000; il suo fondatore, parigino, è nato nel 1970. Dopo essersi laureato nel 1996 ad presso l'Istituto di Arte visuale ad Orleans in design del prodotto e del mobile, nel 1996 si è trasferito in Italia dove ha studiato "Design and Management" presso il Politecnico di Milano. Nel 1997 inizia la sua esperienza professionale, di durata quinquennale, presso lo studio Rodolfo Dordoni, dove ha sviluppato progetti per diverse aziende del settore del lusso dell'arredamento e dell'illuminazione.

Nel 2000 decide di creare un'attività indipendente aprendo un suo studio

personale e lavorando per parecchie aziende italiane tra cui Fontana Arte, Fratelli Boffi, Segno, Tucano e Contardi sistemi di illuminazione.

R2d design studio was created in 2000 in Milan and his founder was born in Paris in 1970. After graduating from the Visual art Institute of Orleans in "Product and Furniture Design" in 1996, he moved to Italy and studied "Design and Management" at the Polytechnic in Milan. In 1997 began five-year professional experience at Rodolfo Dordoni Studio where he developed projects for several top luxury brands in the lighting and furniture fields. In 2000 he decided to create an independent activity opening his own design studio working for several Italian companies as Fontana Arte, Fratelli Boffi, Segno, Tucano e Contardi lighting system.

UGO LA PIETRA

Vive e lavora a Milano. Si è sempre dichiarato "ricercatore" nelle arti visive e nella comunicazione. Ha comunicato le sue ricerche attraverso molte mostre in Italia e all'estero. Ha curato diverse esposizioni alla Triennale di Milano, Biennale di Venezia, Museo d'Arte Contemporanea di Lione, Museo FRAC di Orléans, Museo delle Ceramiche di Faenza, Fondazione Ragghianti di Lucca. Ha vinto il Compasso d'Oro per la Ricerca nel 1979 e il Compasso d'Oro per la Carrera nel 2016. Le sue esperienze di ricerca in architettura e nel design lo hanno portato a sviluppare temi come "La casa telematica" (MoMA di New York, 1972 - Fiera di Milano, 1983), "Rapporto tra Spazio reale e Spazio virtuale" (Triennale di Milano 1979, 1992), "La casa neocleotica" (Abitare il Tempo, 1990), "Cultura Balneare" (Centro Culturale Cattolica, 1985/95). Ha sempre sostenuto con opere, ricerche, scritti e didattica un design carico di significati, per un "design territoriale" contro il design internazionalista.

Ugo La Pietra lives and works in Milan. He has always described himself as a "researcher" of visual arts and communication.

He has presented his research through many exhibitions both in Italy and abroad. He has curated a number of exhibitions at the Triennale di Milano, the Venice Biennale, the Museum of Contemporary Art in Lyon, the FRAC Museum in Orléans, the Ceramics Museum in Faenza, and the Ragghianti Foundation in Lucca.

He was awarded the Compasso d'Oro for The Research in 1979 and Compasso d'Oro for his Carrer in 2016.

His research experience in architecture and design led him to develop such themes as "La casa telematica" (MoMA, New York, 1972 - Fiera di Milano, 1983), "Rapporto tra Spazio reale e Spazio virtuale" (Triennale di Milano, 1979, 1992), "Cultura Balneare" (Cattolica Cultural Centre, 1985, 1995).

Through his works, research, writing and teaching, he has always supported design that is full of meaning, for design that is "territ
